

GULSHAN.

Data Analyst | BI & GenAI Analytics

+91 73306 52064 | gulshankumarkushwaha28@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Hyderabad, India

EXECUTIVE SUMMARY

Adaptable and growth-driven Data Analytics professional currently pursuing a Postgraduate Program in Data Science & Analytics with GenAI at Imarticus Learning, Hyderabad. Skilled in Excel, SQL, Python, Statistics, Power BI, and Machine Learning, with hands-on project experience applying Random Forest, NLP, and PCA techniques. Brings real-world operations experience from Zepto, where data-driven decision-making was used to cut RTO from 17% to 8%, lift on-time delivery from 82% to 96%, and raise rider productivity by 15% while managing 160+ riders and 1,100+ daily orders. Strong communicator and problem-solver who performs well under pressure, is comfortable using GenAI tools (ChatGPT, Copilot) to accelerate analysis and reporting, and is committed to continuous learning and delivering measurable value in data-driven roles such as Data Analyst, BI Analyst, or Junior Data Scientist.

WORK EXPERIENCE

Designation:	Rider Shift In-Charge (Assistant Manager)
Company:	Zepto, Hyderabad
Responsibilities:	• Situation: Fast-paced quick-commerce delivery operation with a large rider workforce and high daily order volumes. • Task: Manage 160+ riders and support daily operations handling 1,100+ orders while safeguarding service quality. • Action: Tracked operational KPIs, optimized shift scheduling, monitored rider performance, and re-engaged inactive riders to strengthen workforce stability. • Result: Reduced RTO from 17% to 8% (~53% relative reduction), improved on-time delivery from 82% to 96% (14 pp gain), and increased rider productivity by 15%. • Tie-back: Built a strong, data-first operational mindset that now drives a full-time transition into data analytics and BI roles.

EDUCATION

Imarticus Learning, Hyderabad	
PG Program in Data Science & Analytics with GenAI	2026 -- Present
Relevant Coursework: Excel, SQL, Python, Statistics & Probability, Machine Learning, Power BI & Tableau, Deep Learning & GenAI	
Vidya Jyothi Institute of Technology, Hyderabad	
B.Tech, Electronics & Communication Engineering -- CGPA 7.2	2021 -- 2025
Narayana Junior College, Hyderabad	
Telangana State Board (MPC) -- CGPA 7.2	2019 -- 2021

PROJECTS

1. Bank Loan Report Dashboard (Capstone Project 1)

- **Action:** Built an end-to-end Bank Loan Analytics Dashboard on a 38,576-record LendingClub-style loan dataset; cleaned and validated data in Excel, calculated and cross-checked KPIs (funded amount, DTI, interest rate, Good vs. Bad Loan classification) using SQL and Python, and designed a 3-page interactive Power BI report (Summary, Overview, Details) with state, grade, purpose, and term filters.
- **Outcome:** Delivered a decision-ready dashboard revealing an 86.2% Good Loan rate across \$435.8M funded and \$473.1M received, with cross-validated KPIs and MTD/MoM trend tracking spanning 38,576 loan applications.
- **Recommendation:** Grade- and term-based repayment patterns (Grade A and 36-month loans outperforming) indicate strong potential to extend the dashboard into predictive default-risk modeling and role-based views for risk, credit, and marketing teams.

2. Fake Profile Detection

- **Action:** Built a machine learning system to detect fake social media profiles, engineering features from profile attributes such as follower counts and activity patterns; applied Random Forest, NLP, and PCA for classification and dimensionality reduction.
- **Outcome:** Delivered a classifier achieving a 94% F1-score, strengthening skills in feature engineering, NLP, and applied ML model evaluation.
- **Recommendation:** Behavioral and activity-based features add strong predictive signal for trust and safety use cases, suggesting value in extending the approach to broader platform-integrity monitoring.

3. EV Charging Station Finder

- **Action:** Developed a full-stack station locator and slot-booking application; modeled relational data in MySQL for real-time station search, user authentication, and booking history, with a Python/Flask backend.
- **Outcome:** Delivered route-based station suggestions end-to-end, reinforcing full-stack development, database design, and application deployment skills.
- **Recommendation:** Real-time availability data and route optimization are key levers for improving user experience in location-based service applications.

SKILLS

Technical

1. Excel (Pivot Tables, VLOOKUP, INDEX-MATCH)
2. SQL (Joins, Aggregations)
3. Python (Pandas, NumPy)
4. Power BI / Tableau
5. Machine Learning (scikit-learn)
6. Statistics & Hypothesis Testing

Soft Skills

1. Communication
2. Problem-Solving
3. Project Management
4. Design Thinking
5. Team Leadership

GenAI & Tools

1. ChatGPT / Copilot
2. Prompt Engineering
3. AI-Assisted Reporting
4. MySQL
5. MS Office
